AH37 | Approved for SmartWay & CARB

Regional Tire for Extreme Mileage & Fuel Efficiency

Hankook Tire & Technology
hankooktire.com/us

AH37

Tire Structure

Belt structure
Minimized motion of belts allows for reduced heat generation.

Carcass
Optimized carcass structure allows for better ride and handling.

Improved bead
Optimized bead profile allows for superior retreadability.

Structurally Designed for Longer Tread Life, Fuel Efficiency, and Durability

Significant Design Features

A. Multi-purpose performance

Combination of center zigzag grooves and 3D kerf provides better traction, increased mileage and reduced irregular wear.

B. Stone ejector

Helps eject stones and protect against stone drilling.

C. Zigzag traction groove

Improves traction and braking performance by expanding the point of intersection through four zigzag grooves with 3D kerf.

D. Optimized shoulder design

Optimized shoulder profile and unique shoulder wall grooves help deliver excellent resistance to uneven rib wear.

E. Optimized footprint

Helps prevent separation, improve traction and mileage performance.

Technology and Benefits

1. 3D Kerf Technology

Better traction, increased mileage and controlled wear with less irregular wear.

2. Innovative mixing system

Optimized tread volume for increased mileage and specifically formulated tread compound that provides exceptional tread wear.

- Conventional
- AH37

Greater molecular weight by minimizing breakdown of polymer chain.

Increased strength and decreased heat generation.

Larger mileage and improved fuel efficiency.
