Polygonal Blocks and Aggressive Groove Design for Toughness on Site and Stability on the Road.

**Exclusive tread compound for on and off road conditions**
- Improved anti chip, cut resistance and endurance.

**Rigid carcass cord**
- Endures heavy loads and high speeds.

### Design Features and Technology

**A. Directional pattern**
- The directional pattern is adopted for excellent handling meaning better traction performance is provided even in wet and muddy conditions.

**B. Interblock tie-bar**
- The interblock tie-bar at the center guarantees outstanding straight driving performance and impact dispersion for blocks, thereby improving durability.

**C. Tapered block and open shoulder design**
- The improved groove shape design ensures tire reliability by effectively discharging stone chips. The tapered block design ensures a flexible response to lateral impact.

**D. Lateral asymmetrical grooves**
- Regularly misaligned lateral grooves help to prevent impact burst.

**E. High structure carbon black compound**
- Improved heat generation is achieved by applying a high structure carbon black compound, which increases fuel efficiency and durability.

**F. Innovative mixing system**
- IMS Ensures Long Mileage and Fuel Efficiency.

**G. Key performance**
- IMS Ensures Long Mileage and Fuel Efficiency.
